

Keeping Medicare Affordable in Massachusetts

Every day, the [Medicare Improvements for Patients and Providers Act](#) (MIPPA) helps people with Medicare afford their prescriptions, premiums, and doctor visits.

Who MIPPA Helps in Massachusetts

121,372 Medicare beneficiaries connected to benefits

421,154 Medicare beneficiaries living at or below \$22,500
(150% of the federal poverty level)

Karen's Story

I work for a State Health Insurance Assistance Program, and the MIPPA funding is literally what keeps some of my clients going. Without this funding, some Medicare beneficiaries will need to make life-or-death decisions based on what they can afford. Medicare is far too complex for most beneficiaries to navigate on their own.

What MIPPA Does

Connects eligible individuals to benefits like the Medicare Savings Program and Medicare Part D Low-Income Subsidy, which help pay for prescription drugs, premiums, and copays

Promotes preventive health services and screenings

Keeps older adults healthy and out of hospitals

Potential Medicare Savings through MIPPA

One of the main components of MIPPA is to connect eligible Medicare Beneficiaries to programs to help them afford prescription drugs through Medicare Part D. Research shows that having prescription drug coverage through Medicare Part D could reduce hospitalization rates by 7%.¹ With an average Medicare hospital stay costing \$14,700,² connecting individuals to prescription drug coverage could create significant health care savings for both the patient and the government.

How MIPPA is Delivered in Massachusetts
